Adding/updating content: displaying folder content

The content of folders can be displayed in different ways, including:

- ◆ standard view
- ◆ summary view
- ◆ tabular view
- ◆ thumbnail view

or

- ◆ can select an item within the folder as the default view (e.g. page, content panel, smart folder)

Adding/updating content: displaying folder content

Standard view

Adding/updating content: displaying folder content

The screenshot shows a web interface for managing a folder named 'Images'. At the top, there is a navigation bar with buttons: 'upload files', 'contents', 'view', 'edit', 'properties', 'sharing', and 'links'. Below this is a secondary bar with dropdown menus: 'translate into', 'actions', 'display', 'add item', and 'state: public draft'. A yellow banner at the top of the folder content area says 'View changed.'.

The folder is titled 'Images' and has a link 'Up one level'. Below the title, a text instruction reads: 'all the images to be used throughout the site should be added to this folder'.

The folder contains three items, each with a thumbnail image and a 'Read More...' link:

- analysis.jpg**: A thumbnail showing a person standing on a beach.
- marine.jpg**: A thumbnail showing a close-up of a sea urchin.
- meetings.jpg**: A thumbnail showing a group of people in a meeting room.

A fourth thumbnail is partially visible at the bottom of the list.

Adding/updating content: displaying folder content

◆ Changing folder view (selecting content item)

The screenshot shows a web browser window at <http://rtc.iwlearn.org/rtc-folder>. The page has a blue header with the IW Learn logo and 'RTC's Demo Logo'. A navigation bar includes links like 'Site Map', 'Accessibility', 'Contact', and 'Site Setup'. Below this, a user profile 'Rcooper' and 'My Folder' are visible. The main content area shows the 'RTC folder' with a 'test folder' containing an item 'Introduction to Workshop'. A 'view' dropdown menu is open, showing options: 'summary view', 'tabular view', 'thumbnail view', 'standard view' (selected), 'contentpanels view', and 'select a content item as default view...'. A yellow arrow points from the 'select a content item as default view...' option to a dialog box in the bottom right.

Subject: Invitation to IW:LEARN IT Workshop, Manila, 5-7 December 2007

Dear Colleague,

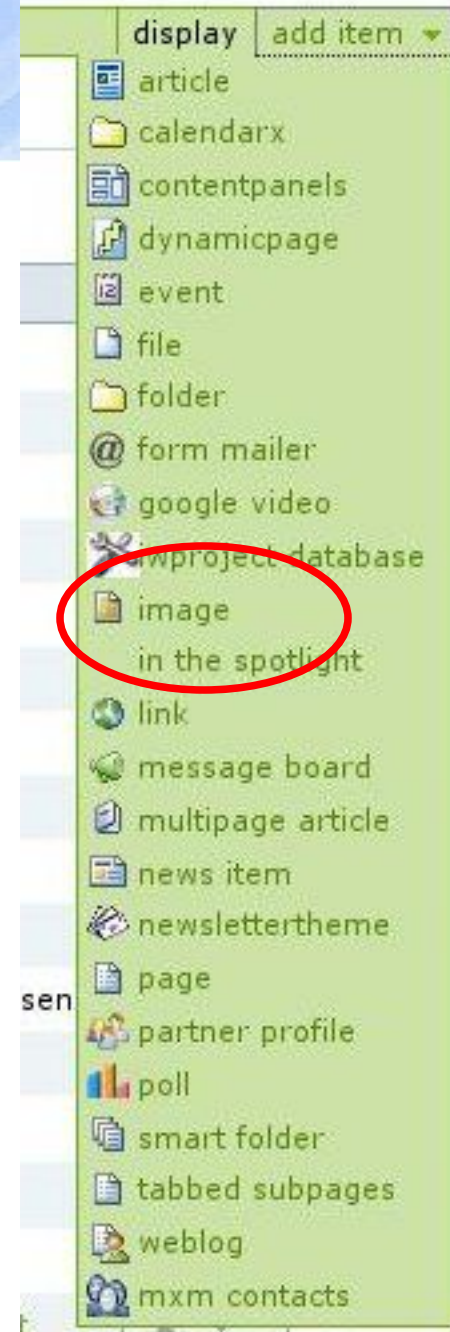

On behalf of the GEF IW:LEARN Project, it is our pleasure to invite you to participate in the IW:LEARN Information Technology (IT) Workshop to be held in Manila, Philippines, Wed 5th - Fri 7th December 2007.

Folder now displays contents of selected item

Adding/updating content: image

◆ Adding an image

- ◆ Prepare image in favourite graphics program (e.g., Gimp) as jpg, gif, png
 - ◆ rescale size for displaying
 - ◆ check size of file/minimise if necessary
- ◆ Upload image to website
 - ◆ Best to keep all images in one location
 - ◆ 'Images' directory already created at root of your instance in Toolkit
 - ◆ Select *image* from *add item menu*

Adding/updating content: image

IW:LEARN IT Workshop

by [rcooper](#) — last modified 2007-11-13 10:40 [History](#)

Asia Regional Workshop held in

The IW:LEARN Information Technology (IT) Workshop to be held in Manila, Philippines, Wed 5th - Fri 7th December 2007.

IW:LEARN aims to strengthen International Waters Resource Management by facilitating structured learning and information sharing among stakeholders. In pursuit of this objective, IW:LEARN has organised a workshop that aims to build the capacity of projects to utilise information and communication technology (ICT) tools available through the IW:LEARN programme.

In particular, the objective of this workshop is to assist projects in creating and managing a project website using the freely available IW:LEARN Toolkit. In addition, related ICT subjects such as GIS and content syndication will be discussed.

what	
when	2007-12-05 10:25 to 2007-12-07 10:25
where	Beijing, China
contact name	Richard Cooper
contact email	iwsea@yahoo.com
contact phone	+66 2218 9463
add event to calendar	vCal iCal

The workshop will focus on how to use the IW:LEARN Website Toolkit to enable any GEF project to have a powerful and easy to manage website.

Target Audience

The target audience is anticipated to be information specialists, IT managers and/or project officers or staff members who are responsible for developing and/or maintaining a project website.

Outcome

- Participants will gain a comprehensive overview of the Toolkit capabilities and functions including freely available resources on the internet. Participants will also gain hands-on knowledge regarding how to create, manage and maintain the website with little or no IT knowledge.
- Participants will be introduced to WebGIS using the Toolkit's PrimaGIS module including how it can be used to access data from other GIS map servers on the internet.
- Participants will be introduced to WebGIS using the Toolkit's PrimaGIS module including how it can be used to access data from other GIS map servers on the internet.

◆ Note *published* state

BLACK

WH

Adding/updating content: *folder contents* tab panel

◆ Renaming content

- ◆ Tick box and click *rename*
- ◆ E.g., renaming *RTC folder*
- ◆ Re-type title and enter short name (in small case letters with **no** blanks, use dash)

Rename item

Each item has a Short Name and a Title, which you can change.

RTC folder (rtc-folder)

New Short Name

Short name is the part that shows up in the URL of the item.

rtc-folder

New Title

RTC folder

rename all

cancel

Adding and updating content: changing state

◆ Changing state

- ◆ Ensure your content is EITHER *private* or *published* (best not to leave as public draft)
- ◆ in one action to change the state of a folder and all of its contents; no need to individually change state of content in folder.

<input type="checkbox"/>	Project Area Map	1 kB	2007-11-16 10:01	Published	▲ ▼

Publishing process

An item's status (also called its review state) determines who can see it. A **private** item can only be viewed by its Owner and by the site management. Only **published** items are available to all site visitors. To make an item published, it has to be reviewed by one of the site's Reviewers. This is done by **submitting it for review**.

Another way to control the visibility of an item is with its **effective date**, *even if its status is published*. This will prevent the item from being displayed in queries (although the item will still be available if accessed directly), until the effective date. The effective date can be set before its effective date, but the item will not be displayed in queries until the effective date. The effective date can be set before its effective date, but the item will not be displayed in queries until the effective date.

Publishing Details

Affected content

<input type="checkbox"/>	title	size	modified
<input checked="" type="checkbox"/>	 RTC contents	1 kB	2007-10-24 10:45

Include folder items

If checked, this will attempt to modify the status of all content in any selected folders and their subfolders.

☒

Effective Date

The date when the item will be available (of course it needs to be published too). If no date is selected the item will be effective immediately.

2006

/

August

/

24

10

:

45

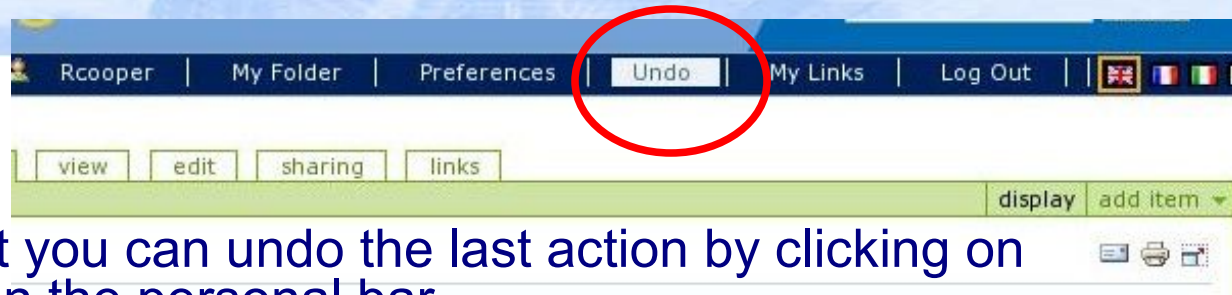

Expiration Date

The date when the item expires. This will automatically make the item invisible for others at the given date. If no date is chosen, it will never expire.

Tick to 'include folder items' to change state of all items in folder

VERY USEFUL

Adding/updating content: how to 'undo' last action

- ◆ As a last resort you can undo the last action by clicking on *undo* located on the personal bar
- ◆ Tick box of action to be undone and click *undo* button
- ◆ Undo *one action* at a time if multiple *undo actions* give error

Undo actions

This applications transactional feature allows you to easily undo changes made to the applications settings or data. You can revert the application to a "snapshot" of its state at a previous point in time.

Select one or more transactions below and then click on the "Undo" button to undo the transactions. Note that even though a transaction is shown below, you will not be able to undo it if later transactions modified objects that were modified by the transaction.
