Promoting Knowledge Management in the CTI

Presented by ADB's Knowledge Management for the CTI project (RETA 7307)
To the CTI Regional Secretariat
4 October 2011. Jakarta, Indonesia

Our Goal Today:

Share with you not just a product but a learning process

Key Questions

- **How do we promote knowledge management in the CTI?**
  - How can different communication tools support KM?
  - How can we strengthen communication in the CTI?
  - Where do we begin? How do we do it?

Exploring Options

- **How can the learning platforms become sustainable?**
  - Recurring cost? Technical support and long-term sustainability? Managed hosting service? Replicating on an existing good practice on learning?
  - Identifying CTI Champions within the Regional Secretariat, DPs, NCCs, other stakeholders

Leveraging on Existing Learning Platforms

- Capitalize on existing knowledge assets and ICT infrastructure instead of reinventing the wheel
- Free use of GEF/IW:LEARN facilities
- Sustained technical support
- Capacity building

Leveraging on Existing Learning Platforms

- Link to Community of Practice (CoP) (https://community.iwlearn.net/)
- Access to the knowledge base from 215 international waters projects

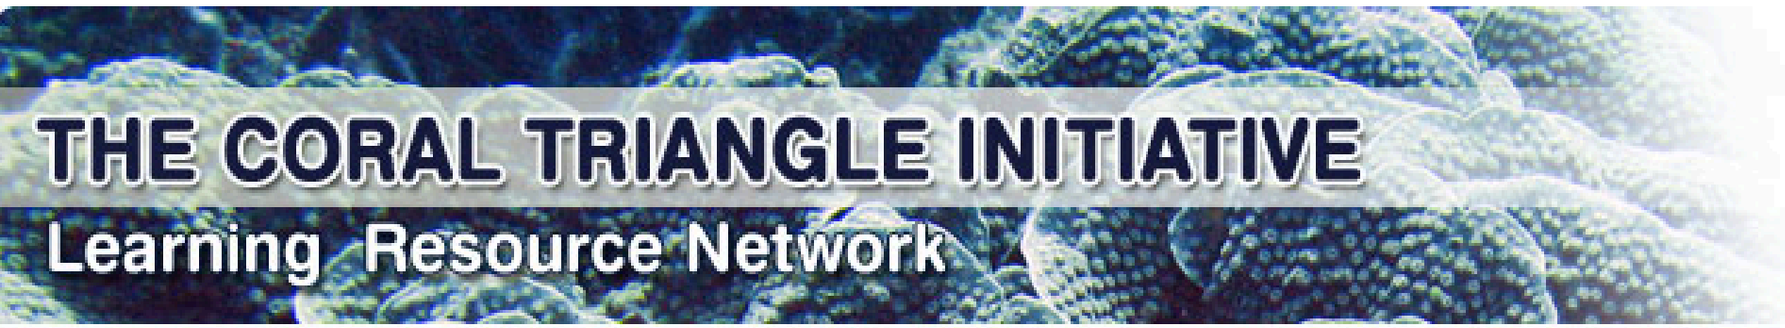
ADB Knowledge Management for the Coral Triangle Initiative (RETA 7307)

Our Role

- Knowledge broker within the CTI
- Harmonize existing portals and websites
- Strengthen linkage among stakeholders
- Promote a culture of learning by doing
  - Focus Areas
  - Learning mechanisms



Country Workspace

- Indonesia
- Malaysia
- Philippines
- Papua New Guinea
- Solomon Islands
- Timor Leste

Welcome to the CTI Learning Resource Network

The Coral Triangle Initiative Learning Resource Network is a knowledge hub that promotes learning, knowledge exchange, and communication initiatives among stakeholders in the Coral Triangle region. It enables organizations and agencies to share their experiences, reflect on them, and apply their learning to improve collective decision-making on issues affecting the Coral Triangle.

Goals of the CTI Regional Plan of Action

1. Designated and effectively manage priority seascapes
2. Apply Ecosystem Approach to Management of Fisheries (EAFM) and Other Marine Resources
3. Set up and effectively manage Marine Protected Areas (MPAs)
4. Strengthen capacity to adapt to climate change

Temporary domain: http://cti.iwlearn.org

Site Features

1. Document Library

2. Access to Decision Support Systems and Tools (DSS)

3. Knowledge Products focused on 4 focus areas KM, PES, DSS and SCTR, and SF

4. News, events, announcements

Site features

5. Country Workspace (Linkage to country portal and information sharing via RSS Feed)

6. Community of Practice (CoP) focused on DSS and SCTR, PES, SF, and KM for CTI

7. Links to development partners, other CTI programs and projects

8. Links to other networks - e.g. MPA Learning Network

Building the CTI Community of Practice (COP)

Summary

Goal

- Developing a **replicable and adaptive learning process** between and among CTI stakeholders

Strategy

- Facilitating **peer-to-peer learning** between and among CTI countries through **learning by doing approach**

Strategy

- **We concentrate on focus areas** (State of the Coral Triangle Report, Decision Support Tools and Systems, Payment for Ecosystem Services, and Knowledge Management for the CTI) **that contribute to capacity building.**

- If mainstreamed, efforts in the focus areas help **strengthen communication** between different stakeholders (e.g. academe, private sector, etc.).

Intended Outcome

- Fostering the building of strong partnerships lead to the ff.:
  - **support the achievement of NPOA and RPOA goals**; and
  - **sustainability of CTI initiatives**.

TERIMA KASIH!
