

GEF International Waters
Learning Exchange and Resource Network
(IW:LEARN)

**Customising IW:LEARN's
Website Toolkit
(Part 1)**

Regional IW:LEARN IT
(LAC) Workshop, Miami,
USA
June 2007

Sean Khan
(Project Manager)
sean.khan@unep.org

Richard Cooper
(Project Coordinator)
richard@iwlearn.org

Khristine Custodio
(IT/Communications
Officer)
khristine@iwlearn.org

Outline (Part 1)

- ◆ Customising Toolkit content
 - ◆ Logo/banner
 - ◆ Project introduction
 - ◆ Project area map (simple image and Google Map)
 - ◆ Content panel (complex/multi-panel page layout)
 - ◆ Partner logos (left column)
 - ◆ Footer
 - ◆ Feedback/Contact Us
 - ◆ Design (colour, font)
 - ◆ Photo and video galleries
 - ◆ Restricted workspace (restricting access to certain parts of site)
 - ◆ Syndicating (disseminating) content

2 2

Outline (*continued*)

- ◆ Plone add-on products
 - ◆ Introduction
 - ◆ Newsletter
 - ◆ Web board
 - ◆ Online poll
 - ◆ Online survey

- ◆ WebGIS – GeoNetwork (Part 3)

3 3

Introduction

- ◆ Aim of presentation
 - to highlight customisation tasks to create functioning project website

Welcome To Project Website

Partner
logos

This area can be used to add a welcome message, short project introduction and key project objectives. Adding images to the page improves the look of the content and is recommended.

You have a choice of **two rich text editors** to add content to pages - Kupu and FCKeditor - which are selected from the Plone Control Panel: [Preferences > Personal Preferences > Select Content Editor](#). Your preferred settings for FCKeditor can be modified through 'FCKeditor Configuration' in the left column of the Plone Control Panel.

Edit this content by clicking on 'contents' tab > 'Welcome to Project Website' page > edit tab

Customising Toolkit content: logo/banner

◆ Changing your logo/banner

- ◆ Create new logo (height 70 pixels x width 500 pixels)
 - ◆ Use open source GIMP graphics software
<http://www.gimp.org/>
 - ◆ Create .gif or jpg and minimise file size. Note transparent png files cause problems in IE6.
- ◆ Go to ZMI: <http://yoursubdomain.iwlearn.org/manage>
- ◆ Click on 'portal_skins' in left column
- ◆ Select portal_skins > custom > logo.gif > customise > browse > upload > save changes
- ◆ Return to home page and do hard refresh (Ctrl + F5) to display new logo.
 - ◆ Empty browser cache if old logo still displaying

Customising Toolkit content: logo/banner

- ◆ Content changes stored in ZMI's *custom* directory
 - ◆ modifications to content are automatically grouped into the custom directory at /portal_skins/custom
 - ◆ Note four changes made to content, including logo

The screenshot shows the Zope web interface. The browser address bar displays `http://rtc.iwlearn.org/manage`. The Zope header indicates the user is logged in as `rcooper`. The left sidebar shows a file tree with folders like `gis`, `images`, and `portal_actions`. The main content area shows the `/portal_skins/custom` folder. A dropdown menu is set to `A dynamic page view generator`. Below this is a table listing files in the directory:

Type	Name	Size	Last Modified
<input type="checkbox"/>	flag-en.gif (flag-en.gif)	1 Kb	2007-11-07 12:16
<input type="checkbox"/>	global_languageselector	1 Kb	2007-11-07 11:06
<input type="checkbox"/>	global_personalbar	3 Kb	2007-11-07 11:31
<input type="checkbox"/>	logo.gif (Logo of rtc.iwlearn.org)	12 Kb	2007-11-08 11:05

At the bottom of the table are buttons for `Rename`, `Cut`, `Copy`, `Delete`, `Import/Export`, and `Select All`.

Welcome To Project Website Demo

This area should be used to add a welcome message, website functionality description, short project introduction and/or any major highlight. Adding images to the page improves the look of the paragraph and makes it more friendly to the eyes. As there is no image used in top header, adding good images here is highly recommendable.

Click to
insert
viewlet e.g.,
calendar

The screenshot displays a web application interface for customizing content panels. The interface is divided into several sections:

- Page parameters:** Located at the top, it includes fields for "Page Title" (set to "Untitled page"), "Row spacing" (set to 5), and "Column spacing" (set to 6). A "save" button is visible on the right.
- Recent changes:** A sidebar on the left lists recent changes, including "Project Area Map" (2007-11-20), "Large Project Area Map" (2007-11-19), "LWMEA banner" (2007-11-19), "test page" (2007-11-19), and "Introduction to Workshop" (2007-11-19).
- Project website demo:** The main content area is divided into two columns. The left column, titled "Upcoming Events", lists "IW: LEARN IT Workshop" (Beijing, China, 2007-12-05) and "LAC IW: LEARN Workshop". The right column, titled "News", lists "News from Beijing Workshop" (2007-11-16) and "Sample News 3".
- Panel configuration:** A modal window titled "Mozilla Firefox" is open, showing the "Panel configuration" settings. It includes a "Related Content" section with a link to "Home » Project website demo". The "Viewlet" section lists three categories: "Folder related" (Title description, ZPT macro), "Site wide" (Calendar, Simple text, RSS, News, Events, In the Spotlight, Partners, Most Recent updates, Main page content, Project Map, Inline frame), and "Personal related" (My recent changes, My favorites, Review list). The "Viewlet settings" section shows a "Skins" dropdown set to "Default".

Callouts provide additional information:

- A callout points to the "Add new panel" button in the top left corner.
- A callout points to the "Column width" and "Row spacing" settings in the "Page parameters" section.
- A callout points to the "Calendar" link in the "Site wide" viewlet category.

The footer of the page includes contact information: "Project PCU, Phys", "Tel: +countrycode citycode phonenumber, Fax: +cc", and a "Find:" search bar. The status bar at the bottom shows "Done", "1.954s", and "100% (iwlearn.org)".

Customising Toolkit content: content panels

Can add panel in main area of page (as here) or in left or right column (create new CP and select option in *edit tab*)

Event items display in calendar – click to display event

- ◆ Event item displayed after clicking calendar data

The screenshot shows the IW:LEARN website interface. At the top, a navigation bar includes a user profile 'Rcooper', 'My Folder', 'Preferences', 'Undo', 'My Links', and 'Log Out'. Below this, a breadcrumb trail reads 'you are here: home'. On the left, a 'Navigation' menu lists: 'Home' (highlighted), 'About the project', 'Information and Publications', 'Maps & GIS', 'News & Events', 'Links', and 'Feedback / Contact us'. The main content area is titled 'Search results' and contains the text: 'Did you not find what you were looking for? Try the [Advanced Search](#) for more precise search options.' Below this, it states '1 items matching your criteria.' followed by an RSS icon. The search result is for 'IW:LEARN IT Workshop [1%] by rcooper, 2007-11-13 10:40', with a sub-line 'Asia Regional Workshop held in'.
