Welcome To Project Website Demo

This area should be used to add a welcome message, website functionality description, short project introduction and/or any major highlight. Adding images to the page improves the look of the paragraph and makes it more friendly to the eyes. As there is no image used in top header, adding good images here is highly recommendable.

Customising Toolkit content: restricting site access

- ◆ You want to **restrict access** to certain parts of your site
- ◆ Need to understand three key publication states of content (of page/folder/object):
 - ◆ **published** (visible to everyone)
 - ◆ can retract (i.e., unpublish) a published item to public draft state
 - ◆ **private** (only visible to users with permission)
 - ◆ **public draft** (may or may not be visible to everyone)
 - ◆ initial state of all newly added content
 - ◆ events and news items **must** be published
 - ◆ other items may be visible to all
- ◆ **give it private status if you want to limit access!**

9 9

Customising Toolkit content: restricting site access

- ◆ Users can have different *roles* which means they have certain permissions
- ◆ Four standard permissions:
 - ◆ **Manager** - can publish content, change anything in site
 - ◆ **Member** – cannot publish content, can only add content to own 'my folder' area
 - ◆ **Reviewer** – defined on a per-folder basis (local role), can edit/publish content
 - ◆ **Owner** – defined on a per-folder basis (local role), owner is creator of folder/page/object, cannot publish content
- ◆ More info:

<http://www2.le.ac.uk/plonedocs/userguide/part1-basic/permissions>

10 10
10

Customising Toolkit content: restricting site access

- ◆ Example: to restrict access to '*PMO Documents*' folder
 - ◆ Make folder *private*
 - ◆ Go to Plone control panel > click on *Users and groups administration*
 - ◆ Select *groups* tab and add *new group*
 - ◆ Give new group name, e.g., 'PMO staff'

Groups Overview

[Up to Site Setup](#)

Groups are logical collections of users, such as departments and business units. Groups are not directly related to permissions on a global level, you normally use Roles for that - and let certain Groups have a particular role.

group search

group name	roles					remove group
	groupmember	member	reviewer	weblogauthorrole	manager	
 Administrators	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
 Reviewers	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Roles Management

Roles are collections of permissions. The most common role is the Member role, which is any member of the portal. You can define additional roles, but you normally only do that when you need to create a new discrete unit of permissions that you can combine to make up a Group.

Currently, if you want to add a new role, you must use the Zope Management Interface, as adding roles is considered a development task.

Add new group

Roles Management

Roles are collections of permissions. The most common role is the Member role, which is any member of the portal. You can define additional roles, but you normally only do that when you need to create a new discrete unit of permissions that you can combine to make up a Group.

Currently, if you want to add a new role, you must use the Zope Management Interface, as adding roles is considered a development task.

Assign PMO Staff group with member permissions

Customising Toolkit content: restricting site access

The screenshot displays the 'RTC's Demo Logo' site administration interface. The top navigation bar includes links for Site Map, Accessibility, Contact, and Site Setup. A user profile for 'Rcooper' is visible, along with links for My Folder, Preferences, and Log out. The left sidebar contains a 'Site Setup' menu with options like Plone Configuration, Add/Remove Products, Error Log, Keyword Manager, Language Settings, Mail Settings, Navigation Settings, Placeful Workflow, Portal Settings, Search Settings, Skins, Smart Folder Settings, Users and Groups Administration, Zope Management Interface, Add-on Product Configuration, Analytics for Plone, External Site Catalog, and FCKeditor configuration. The main content area shows the 'users' tab selected, with a message 'You have been registered.' and 'User added.' Below this is the 'Users Overview' section, which includes a link 'Up to Site Setup', instructions on how to click a user's name to view details or an envelope icon to send mail, and a note about roles. At the bottom of the overview section is an 'add new user' button and a search box with 'Search' and 'Show All' buttons.

Registration Form

Personal Details

Full Name
Enter full name, eg. John Smith.

User Name ■
Enter a user name, usually something like 'jsmith'. No spaces or special characters. Usernames and passwords are case sensitive, make sure the caps lock key is not enabled. This is the name used to log in.

E-mail ■
Enter an email address. This is necessary in case the password is lost. We respect your privacy, and will not give the address away to any third parties or expose it anywhere.

Password ■
Minimum 5 characters.

Confirm password ■
Re-enter the password. Make sure the passwords are identical.

☐ **Send a mail with the password**

 **Local roles changed.**

Current sharing permissions for PMO Documents

You can share the rights for both entire folders and single items. These users have privileges here:

Assigned Roles for PMO Documents

<input type="checkbox"/>	name	type	inherited role(s)	local role(s)
<input type="checkbox"/>	 rcooper (rcooper)	User	Manager , Owner	Owner
<input type="checkbox"/>	 PMO Staff	Group		<input type="checkbox"/> Manager
<input type="checkbox"/>	 bovorin	User	Owner	

Roles to assign to selected user(s)/group(s)

☐ GroupMember ☐ Manager ☐ Member
☐ Reviewer ☐ WeblogAuthorRole

 assign selected role(s) to selected user(s)/group(s)

 delete selected role(s) and user(s)/group(s)

Confirmation of
'PMO Staff' group
assigned manager
role

Add sharing permissions to users

Sharing is an easy way to allow others access to collaborate with you on your content. To share this item, search for the person's name or email address in the form below, and assign them an appropriate role. The most common use is to give people Manager permissions, which means they have full control of this item and its contents (if any).

Customising Toolkit content: restricting site access

- ◆ Check folder is restricted to PMO staff
 - ◆ Log out and check 'PMO Documents' folder is not visible to anonymous visitors
 - ◆ Log in PMO Staff member and check contents of 'PMO Documents' folder is accessible...

The screenshot displays the 'RTC's Demo Logo' website. The top navigation bar includes a search box, a user profile 'Staffm2', and links for 'My Folder', 'Preferences', 'Undo', 'My Links', and 'Log Out'. A breadcrumb trail indicates the current location: 'you are here: home — pmo documents'. The left sidebar contains a 'Navigation' menu with links to Home, About the project, Information and Publications, Maps & GIS, News & Events, Links, Feedback / Contact us, Photos, and 'PMO Documents' (which is highlighted). Below 'PMO Documents' is a link to 'Example file'. The main content area shows a toolbar with 'upload files', 'contents', 'view', 'edit', 'properties', 'sharing', and 'links'. Below the toolbar, the 'PMO Documents' folder is expanded, showing 'Up one level' and 'PMO documents with restricted access'. A file named 'Example file' is listed, attributed to 'rcooper' and dated '2007-11-20 14:33'. The file's state is set to 'private'. Two callout boxes provide context: one points to the 'Log Out' link stating 'PMO Staff member logged in', and another points to the 'Example file' in the navigation tree stating 'Private content visible to member in navigation tree'.

PMO Staff member logged in

Private content visible to member in navigation tree

Customising Toolkit content: syndication

- ◆ Syndication – to ensure content on your website is disseminated to GEF IW community and partners
- ◆ Syndication is achieved via RSS feed (= URL address)
- ◆ RSS alerts others when new content added to your site
- ◆ Create RSS feeds for content on your site by enabling syndication for your site (enabled by default for News and Events in Toolkit)

Note for techies (how to enable in new instances):

- ◆ Log into ZMI
 - ◆ Select portal_syndication > *Properties* tab > Enable syndication
 - ◆ Select portal_syndication > *Actions* tab > tick visible option
- ◆ Log into Plone.
 - ◆ Go to the folder with content that you want to syndicate.³ Select *syndication* tab > enable syndication
