Planned Enhancements

GEF IW:LEARN5 (2022-2026)

LME22

Paris, July 2023

Enhancement of TDA/SAP process (MSP & SBE)

FUNDED BY IMPLEMENTED BY EXECUTED BY

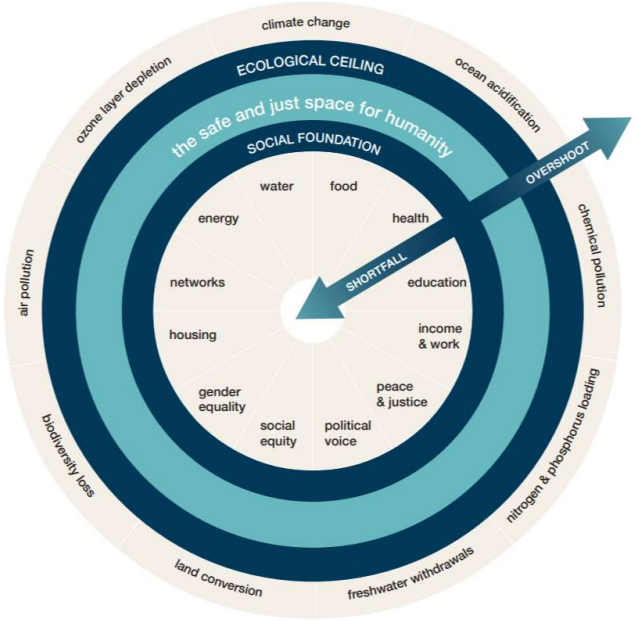
IW:LEARN5 Activity 4.3.1: Development of a practical approach to integrate **marinè spatial planning (MSP)** and strategic planning on **sustainable blue economy (SBE)** into the TDA-SAP process for Large Marine Ecosystems; and develop training material.

Objectives:

- Facilitate the use of **MSP** as a public policy tool to **strengthen SBE opportunities**.
- Link into the **TDA/SAP methodology**:

  Considering existing frameworks and tools on ocean governance (e.g., Integrated Ocean Management) and sustainable economics (e.g., doughnut economics).

- **Co-development** between experts and LME practitioners.



The safe and just space for humanity (Raworth, 2017)

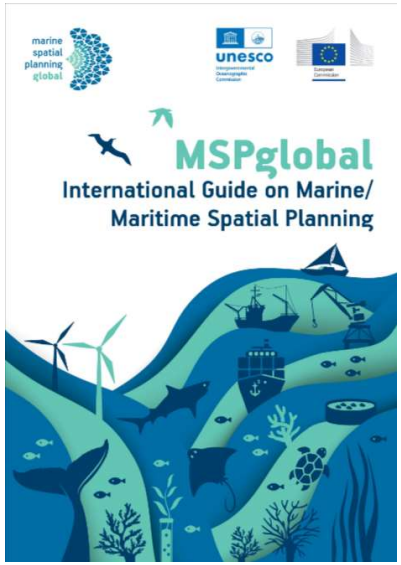
Enhancement of TDA/SAP process (MSP & SBE)

Steps:

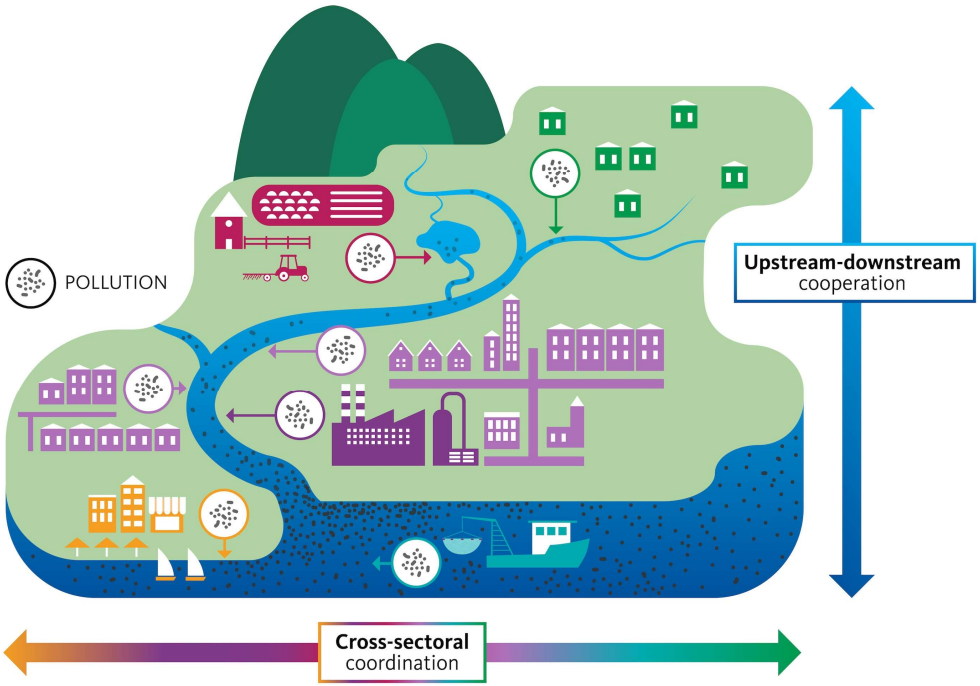
- Scoping exercise and **workshop** to develop a draft approach;

  Break-out session B - *Consultation on the development of a practical approach to integrate MSP into the TDA/SAP process* **(Wednesday 12 July @ 16.00)**

- **Complementary** to other initiatives (e.g., UNEP SBE framework);
- Approach **tested** with LME managers;
- Develop **training materials**;
- Implement in **training events** in LME regions (Activity 4.3.3).



Integrating Source-to-Sea Management in the TDA/SAP process



Key flows connect the source-to-sea system from land to open ocean.

Source-to-sea management considers the environmental, social and economic connections across the whole water cycle and the entire source-to-sea system.

- *Break-out session B - Consultation of the integration of source-to-sea considerations in the TDA/SAP framework (Wednesday 12 July @ 16.00)*
- *Initial development and consultation at IWC10*
- *Draft review and testing of materials at a regional workshop, finalization*
