Purpose of the KM Strategy

- Leverage and share knowledge assets generated by the Child Projects of the MedProgramme with the intended beneficiaries and audiences.
- Strengthening the science-policy interface (SPI) and influencing decision-making through data and information sharing, capacity building, and regional stakeholder engagement.
- Supporting the objectives of the Barcelona, Stockholm and Minamata Conventions and the work of the UNEP/MAP through effective stocktaking and scaling up, and broader adoption of MedProgramme's approaches and results.
- Fostering incremental innovation within GEF programmatic approaches and enriching the knowledge base of GEF Implementing and Executing Agencies.
